**Miles Software releases new and enhanced version of its Wealth Management Solution**

*MoneyWare WMS is Platform Ready for MS SQL Server*

**Mumbai, March 21, 2011:** Miles Software Solutions Pvt. Ltd. (Miles Software), a leader in providing technology solutions to the financial markets, today announced its new version of MoneyWare Wealth Management Solution (WMS) is Platform Ready for Microsoft SQL Server 2008 R2.

Microsoft SQL Server 2008 R2 data management software provides a trusted, productive, and intelligent data platform offers customers enhanced scalability, and simplifies data processing and data management. MoneyWare WMS offers business solutions for client management, portfolio management, transaction management, and revenue management on a single platform.

“Our ISV community is alive with innovation, and we’re committed to helping our partners drive the next generation of software experiences,” said Ross Brown, Vice President of ISV and Solutions Partners for the Worldwide Partner Group at Microsoft. “Adding compatibility for the latest Microsoft technologies help Miles Software to stay ahead of the competition and give their customers access to cutting-edge technologies.”

“We are excited to launch this new version of MoneyWare WMS,” said **Mr. Milan Ganatra, CEO, Miles Software**. “Making our application compatible with Microsoft SQL Server 2008 helps us offer our customers compelling benefits, including multifold scalability, improved security and reliability features and faster data processing to meet their real-time online requests.”

MoneyWare WMS provides online real time view of the business. The solution allows systematic asset allocation, formulation of various fees and charges, risk profiling as well as financial planning. It has the capability of automating the entire suite of investments during the lifecycle of wealth creation, growth and management. Further enhancing Miles Software’s advantage of covering a wide array of asset classes - mutual funds, equity, fixed income instruments, real estate and commodities - the solution covers the entire customer management lifecycle, aiming to reduce the transaction time thereby increasing the operational efficiency.
